

## Capstan type C 307 H

### Products

Self-braking worm gear drives with electric, hydraulic or even pneumatic motor, available in on-deck or below-deck build types. The on-deck drive is equipped with a waterproof motor for intermittent use. Featuring a cast iron capstan head mounted on a heavy duty planetary gearbox. The entire drive is mounted in a watertight tube frame providing optimal protection from the elements.

|-------------------------------|-----------|
| Manufacturer code             | C 307 H   |
| Medium                        | Hydraulic |
| Environment                   | Marine    |
| Application                   | Pulling   |
| Series                        | C         |
| Working Load Limit (WLL) [kg] | 6000 kg   |
| Lifting WLL first layer       | 6000 kg   |
| Speed at first layer          | 25 m/min  |
| Rope diameter                 | 52 mm     |
| Mass                          | 870 kg    |
| Flow                          | 105 L/min |
| Pressure drop                 | 220 bar   |
| Neck diameter                 | 405 mm    |
