

## Winch type MCW 750

### Products

The MCW series covers the electric self-braking worm gear winches. Developed for heavy duty pulling and traversing work up to 2000 kg , the MCW series has been a longstanding part of the Emcé winch programme. The MCW series is also available as a lifting winch with capacities up to 1700 kg. For more accurate positioning during pulling, or repetitive lifting jobs, an optional motor brake is available.

|                               |                 |
|-------------------------------|-----------------|
| Manufacturer code             | MCW 750         |
| Medium                        | Electric        |
| Environment                   | Industrial      |
| Application                   | Traversing      |
| Series                        | MCW             |
| Working Load Limit (WLL) [kg] | 600 kg          |
| Number of layers              | 5               |
| Lifting WLL first layer       | 600 kg          |
| Lifting WLL top layer         | 390 kg          |
| Pulling WLL first layer       | 750 kg          |
| Pulling WLL top layer         | 490 kg          |
| Speed at first layer          | 6 m/min         |
| Drum capacity first layer     | 6 m             |
| Drum capacity top layer       | 42 m            |
| Rope diameter                 | 7 mm            |
| Motor power S2 duty           | 1.5 kW          |
| Motor voltage                 | 400V-AC-3-phase |
| Mass                          | 55 kg           |
