

## Winch type MCW 2200

## **Products**

The MCW series covers the electric self-braking worm gear winches. Developed for heavy duty pulling and traversing work up to  $2000~\mathrm{kg}$ , the MCW series has been a longstanding part of the Emcé winch programme. The MCW series is also available as a lifting winch with capacities up to  $1700~\mathrm{kg}$ . For more accurate positioning during pulling, or repetitive lifting jobs, an optional motor brake is available.

| Manufacturer code             | MCW 2200        |
|-------------------------------|-----------------|
| Medium                        | Electric        |
| Environment                   | Industrial      |
| Application                   | Traversing      |
| Series                        | MCW             |
| Working Load Limit (WLL) [kg] | 1700 kg         |
| Number of layers              | 5               |
| Lifting WLL first layer       | 1700 kg         |
| Lifting WLL top layer         | 1055 kg         |
| Pulling WLL first layer       | 2200 kg         |
| Pulling WLL top layer         | 1365 kg         |
| Speed at first layer          | 7 m/min         |
| Drum capacity first layer     | 9 m             |
| Drum capacity top layer       | 63 m            |
| Rope diameter                 | 12 mm           |
| Motor power S2 duty           | 5.5 kW          |
| Motor voltage                 | 400V-AC-3-phase |
| Mass                          | 190 kg          |
