

Winch type TR 000E

Products

Traction winches are mainly built for purpose. Winches are built to order and can be executed with a self-braking wormgear or planetary gear depending on the load required. The drive can be either electric, hydraulic or pneumatic. The winches are mainly used for traversing applications where a compact but heavy duty system is required. EMCÉ has supplied systems up to and including 10,000 kg.

Manufacturer code	TR 000E
Medium	Electric
Environment	Oil and Gas
Application	Traversing
Series	TR
Working Load Limit (WLL) [kg]	on request kg

Drawing on request
